DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 17, 18, 20 and 26 drawn to a method of encoding a tag, classified in class 235, subclass 435.
- II. Claim 8, drawn to a method for alerting suspected theft, classified in class 340, subclass 568.1.
- III. Claim 9, drawn to a method for stock management (inventory), classified in class 340, subclass 5.92.
- IV. Claim 10, drawn to surgical instrument tracking, classified in class 340, subclass 572.1.
- V. Claim 11, drawn to authorizing electrical appliances, classified in class 340, subclass 572.4.
- VI. Claims 12-16, and 19 drawn to a method for decoding a tag, classified in class 235, subclass 435.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case the different inventions are encoding a tag; anti-theft; inventorying; authorizing electrical appliances and decoding a tag.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-VI, restriction for examination purposes as indicated is proper.
